DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35 and 39-64, drawn to the apparatus of a device with a bearing assembly, classified in class 310, subclass 90.
 - II. Claims 36-38, drawn to the method of damping vibration, classified in class 310, subclass 51.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as being used to store kinetic energy.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to attorney George W. Hartnell, III, Reg. No. 42,639 on 8/27/02 to request an oral election to the above restriction requirement, but did not result in an election being made.
